

The image shows a sample of Fredrix 901 VWR Crystal print. The background is a complex, abstract composition of colors and textures. It features a mix of blue, orange, and black tones, with a prominent pattern of dark, circular shapes that resemble ink splatters or a dense forest of small trees. The overall effect is one of depth and detail, showcasing the print's ability to reproduce fine art with high fidelity.

COLOR:	
Whiteness	100 minimum
Brightness	90 minimum
L	95 typical
a	3.00 typical
b	-6.00 typical
SPECTRAL GLOSS, 60°:	3.0 typical

This canvas is designed for digital printing applications using water based pigments and dye sets. Although designed for all printers using these ink sets, actual results may vary depending on printer model, age, print design, environmental conditions, and other factors. Exposure of a print to atmospheric pollutants, or to temperature, humidity, and / or lighting extremes can result in fading, color shifting, or other visual changes. The ideal conditions for printing and storage are a temperature of 70°F  $\pm$ 5°F and relative humidity of 50% RH  $\pm$ 3% RH. Store standing on end in box with plastic end caps in place. Never leave roll lying flat for extended periods of time.

Tara Materials guarantees only the canvas itself against defects in quality or workmanship. No other warranty is expressed or implied.
